# Bose Professional Introduces MA3 Micro Array to Bring Clarity to Challenging Spaces

*Compact modular line array helps focus sound on the audience while complementing the architecture*

**BOSTON, MA — November 5, 2026** — Bose Professional today introduced the MA3 Micro Array, a compact, passive, modular micro line array designed to help integrators deliver clear speech and music in acoustically challenging spaces while complementing the architecture. MA3 modules combine into suspended or wall-mounted arrays, with adjustable splay angles to shape vertical coverage around the listening area.

"Modular array technology has been out of reach for a lot of everyday acoustically challenging projects because of cost, size and complex, time-consuming installs. MA3 Micro Array changes that," said Bose Professional Vice President of Sales, Americas, Shawn Watts. "It's compact, it's affordable and it's a one-person install, so integrators can give a room the precise vertical coverage of an array without the footprint, the price tag or the hassle."

Each MA3 module combines a 1-inch compression driver with four 2.25-inch woofers in a compact white enclosure. Integrated inter-module hardware joins enclosures into a clean, cohesive array, with an onboard passive crossover and pluggable terminal connection to simplify system wiring.

The MA3SB Suspension Bracket supports flown arrays, and the MA3WB Wall-mount Kit supports wall-mounted configurations where wall placement better suits the architecture or ceiling height. Integrators can combine modules into suspended or wall-mounted arrays and adjust splay angles to shape vertical coverage around the listening area.

MA3 modules are offered in single-pack and four-pack configurations, so integrators can order the quantity the design requires. The modular format lets them build the array around the room without making the loudspeaker system the visual focus.

**About Bose Professional**
Bose Professional is dedicated to transforming spaces with sound. Driven by the belief that innovation begins with exploration, our dedicated and passionate team combines deep

expertise with a spirit of invention to create audio solutions that enhance performance and commercial environments. From hotels and restaurants to houses of worship, universities, and retail spaces, our systems deliver legendary performance and are seamless to design, install, and operate. For over 50 years, we've partnered with AV integrators, system designers, installers, and consultants around the world to build unforgettable audio experiences—and we're just getting started.
