SAFETY INFORMATION

1. Parts that have special safety characteristics are identified by the  symbol on schematics or by special notes on the parts list. Use only replacement parts that have critical characteristics recommended by the manufacturer.

2. Make leakage current or resistance measurements to determine that exposed parts are acceptably insulated from the supply circuit before returning the unit to the customer.

Use the following checks to perform these measurements:

A. Leakage Current Hot Check - With the unit completely reassembled, plug the AC line cord directly into a 264V (line-neutral), 60Hz power source. (Do not use an isolation transformer during this test.)

Use a leakage current tester or a metering system that complies with American National Standards Institute (ANSI) UL 101 "Leakage Current for Appliances" and Underwriters Laboratories (UL) 60065/ IEC 60065 Clause 9.1.1.

With the unit Standby switch in the ON position, measure from a known earth ground (metal waterpipe, conduit, etc.) to all exposed metal parts of the unit BRACKET AL ALLOY (item 17 of Figure 2), especially any exposed metal parts that offer an electrical return path to the chassis, and repeat the test with the unit Standby switch in the OFF position.

Any current measured must not exceed 3.5 mA (or MIU). Reverse the unit power cord plug in the outlet and repeat test.

ANY MEASUREMENTS NOT WITHIN THE LIMITS SPECIFIED HEREIN INDICATE A POTENTIAL SHOCK HAZARD THAT MUST BE ELIMINATED BEFORE RETURNING THE UNIT TO THE CUSTOMER.

B. Insulation Resistance Test Cold Check - (1) Unplug the power supply and connect a jumper wire between the Line PIN and Neutral PIN the plug.

(2) Measure the resistance with an ohmmeter between the jumpered AC plug and each exposed metallic cabinet part on the unit. The resistance measured to the product enclosure should be between 2 and infinite M Ω s. Also, the resistance measured to exposed input/output connectors should be between 4 and infinite M Ω s.

If it is not within the limits specified, there is the possibility of a shock hazard, and the unit must be repaired and rechecked before it is returned to the customer.

CAUTION: The Bose L1 Pro32 Portable Line Array contains no user-serviceable parts. To prevent warranty infractions, refer servicing to warranty service stations or factory service.

PROPRIETARY INFORMATION

THIS DOCUMENT CONTAINS PROPRIETARY INFORMATION OF BOSE CORPORATION WHICH IS BEING FURNISHED ONLY FOR THE PURPOSE OF SERVICING THE IDENTIFIED BOSE PRODUCT BY AN AUTHORIZED BOSE SERVICE CENTER, AND SHALL NOT BE REPRODUCED OR USED FOR ANY OTHER PURPOSE.

Electrostatic Discharge Sensitive (ESDS) Device Handling

This unit contains ESDS devices. We recommend the following precautions when repairing, replacing or transporting ESDS devices:

- Perform work at an electrically grounded work station.
- Wear wrist straps that connect to the station or heel straps that connect to conductive floor mats.
- Avoid touching the leads or contacts of ESDS devices or PC boards even if properly grounded. Handle boards by the edges only.
- Transport or store ESDS devices in ESD protective bags, bins, or totes. Do not insert unprotected devices into materials such as plastic, polystyrene foam, clear plastic bags, bubble wrap or plastic trays.

WARRANTY

The Bose L1 Pro32 Portable Line Array is covered by a limited 5-year transferable warranty. Units that fail within 90 days of sale should be replaced.

PART LIST NOTES

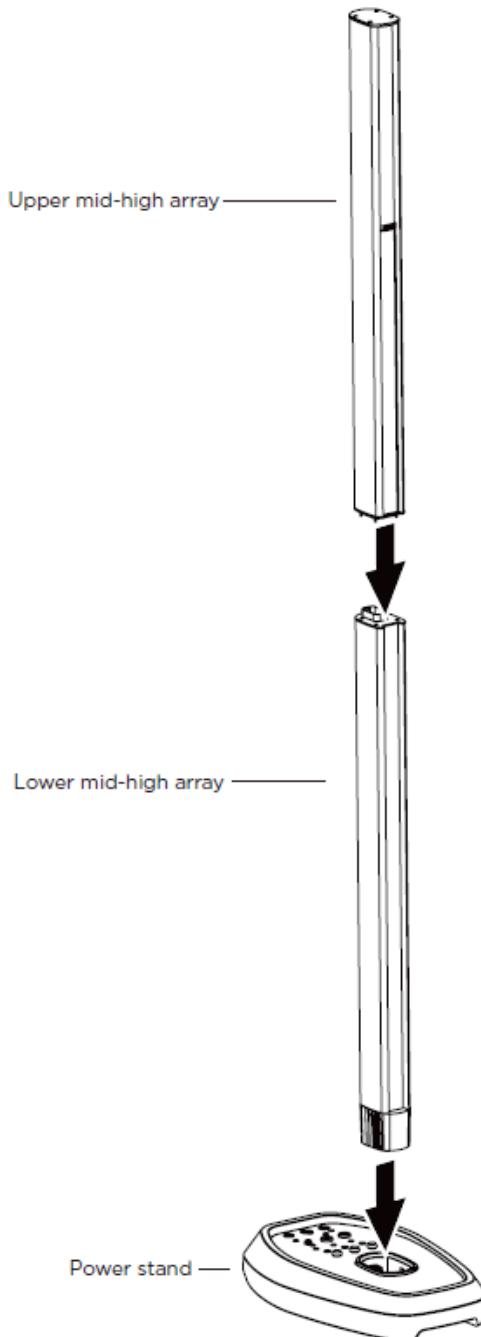

1. The individual parts located on the PCBs are listed in the Electrical Part List.
2. This part is referenced for informational purposes only. It is not stocked as a repair part. Refer to the next higher assembly for a replacement part.
3.  This part is critical for safety purposes. Failure to use a substitute replacement with the same safety characteristics as the recommended replacement part might create shock, fire and/or other hazards.

PRODUCT DESCRIPTION

L1 Pro32 Portable Line Array is the most compact, most portable, play-anywhere system. It is ideal for Singer-Songwriter with 32 Twiddlers.

Before connecting the power stand to a power source, assemble the L1 Pro32 using the upper mid-high array and lower mid-high array.

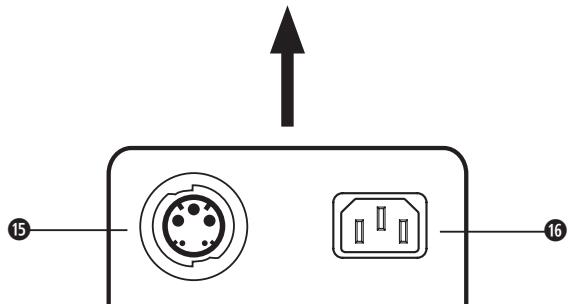

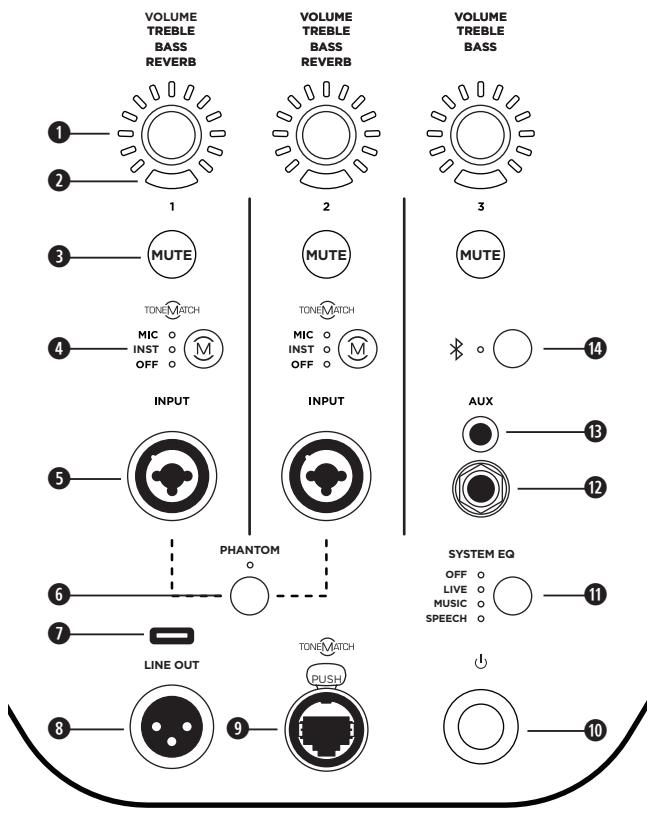

1. Insert the lower array into the power stand.
2. Insert the upper array into the lower array.

The L1 Pro32 can be used without the upper array. This configuration is useful when a venue ceiling cannot accommodate the height of the the L1 Pro32.

PRODUCT DESCRIPTION

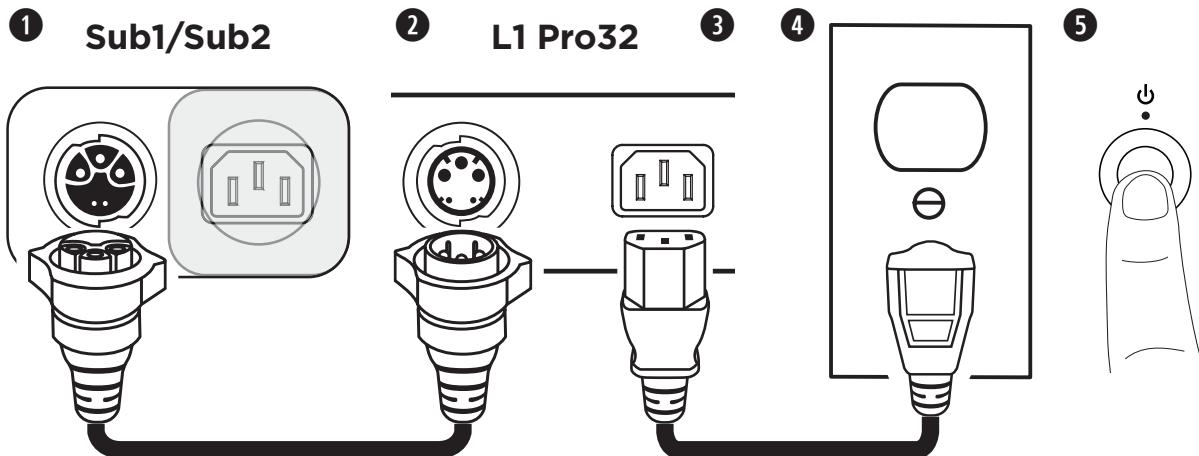

Connections and Controls

- ➊ **Channel Parameter Control:** Adjust the level of volume, treble, bass, or reverb for your desired channel. Press the control to switch between parameters; rotate the control to adjust the level of your selected parameter.
 - ➋ **Signal/Clip Indicator:** The LED will illuminate green when a signal is present and will illuminate red when the signal is clipping or the L1 Pro is entering limiting. Reduce the channel or signal volume to prevent signal clipping or limiting.
 - ➌ **Channel Mute:** Mute the output of an individual channel. Press the button to mute the channel. While muted, the button will illuminate white.
 - ➍ **Channel ToneMatch Button:** Select the ToneMatch preset for an individual channel. Use **MIC** for microphones and use **INST** for acoustic guitar. The corresponding LED will illuminate white while selected.
 - ➎ **Channel Input:** Analog input for connecting microphone (XLR), instrument (TS unbalanced), or line level (TRS balanced) cables.
 - ➏ **Phantom Power:** Press the button to apply 48-volt power to channels 1 and 2. The LED will illuminate white while phantom power is applied.
 - ➐ **USB Port:** USB-C connector for Bose service use. **Note:** This port is not compatible with Thunderbolt 3 cables.
 - ➑ **XLR Line Output:** Use an XLR cable to connect the line-level output to a Sub1/Sub2 or another bass module.
 - ➒ **ToneMatch Port:** Connect your L1 Pro to a T4S or T8S ToneMatch mixer via a ToneMatch cable.
- CAUTION:** Do not connect to a computer or phone network.
- ➓ **Standby Button:** Press the button to power on the L1 Pro. The LED will illuminate white while the L1 Pro is on.
 - ➔ **System EQ:** Press the button to scroll through and select a master EQ suitable for the use case. The corresponding LED will illuminate white while selected.
 - ➕ **TRS Line Input:** Use a 6.3-millimeter (1/4-inch) TRS cable to connect line-level audio sources.
 - ➖ **Aux Line Input:** Use a 3.5-millimeter (1/8-inch) TRS cable to connect line-level audio sources.
 - ➗ **Bluetooth® Pair Button:** Set up pairing with Bluetooth capable devices. The LED will flash blue while the L1 Pro is discoverable and illuminate solid white when a device is paired for streaming.
 - ➘ **SubMatch Output:** Connect a Sub1/Sub2 bass module with a SubMatch cable.
 - ➙ **Power Input:** IEC power cord connection.

PRODUCT DESCRIPTION

Connecting Power and a Sub1/Sub2

1. Plug the SubMatch cable into the **SubMatch Input** on a Sub1/Sub2.
2. Plug the other end of the SubMatch cable into the **SubMatch Output** of the L1 Pro32.
3. Plug the power cord into the **Power Input** on the L1 Pro32.
4. Plug the other end of the power cord into a live electrical outlet.

Note: Do not power on the L1 Pro until after you've connected your sources. See **Connecting Sources** on page 9.

5. Press the **Standby Button**. The LED will illuminate white while the L1 Pro is on.

Note: Press and hold the **Standby Button** for 10 seconds to reset the L1 Pro to factory settings.

Press the **Standby Button** on any connected Sub1/Sub2. For additional information on how to set up a Sub1/Sub2, see the Sub1/Sub2 owner's guide at PRO.BOSE.COM.

Note: When two Subs are connected to the L1 Pro32, first turn on the Sub connected directly to the L1 Pro32, then turn on the second Sub.

AutoOff/Low-power Standby

After four hours of no use, the L1 Pro will enter AutoOff/Low-power Standby mode to save power. To wake the L1 Pro from AutoOff/Low-power Standby mode, press the **Standby Button**. When the L1 Pro32 goes into AutoOff/Low-power Standby mode, this will cut power to any Sub1/Sub2 connected with a SubMatch cable. Press the **Standby Button** on a connected Sub1/Sub2 to wake it from AutoOff/Low-power Standby mode.

Note: Disable AutoOff/Low-power Standby mode by pressing and holding all three **Channel Parameter Controls** for 10 seconds, or via the Settings page in the L1 Mix app. Enable AutoOff/Low-power Standby mode by repeating this step. Disabling AutoOff/Low-power Standby mode will result in higher energy usage when the L1 Pro is not in use.

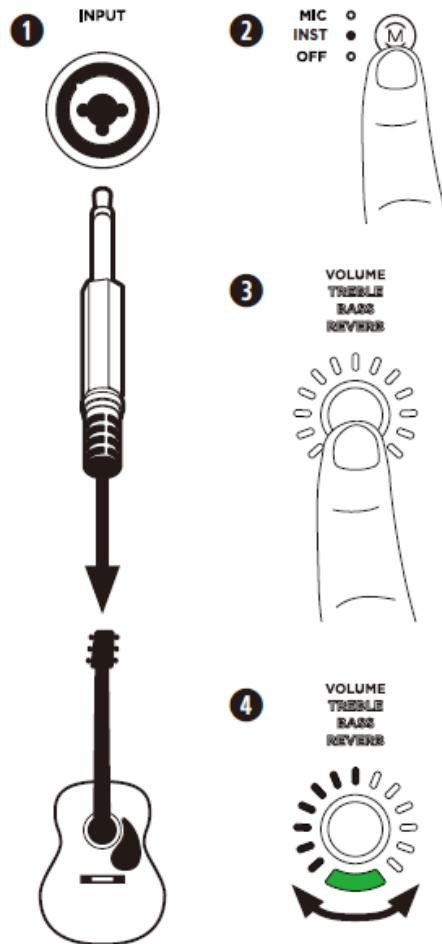

PRODUCT DESCRIPTION

Connecting Sources

Channel 1 & 2 Controls

Channel 1 and 2 are for use with microphones, guitars, keyboards, or other instruments. The channel inputs are suitable for a wide range of input types and will have the proper gain staging to minimize noise when the channel volume is set for the desired output level.

1. Connect your sound source to the **Channel Input** with the appropriate cable.
2. Apply a ToneMatch preset—to optimize the sound of your microphone or instrument—by pressing the **Channel ToneMatch Button** until the LED for your chosen preset is illuminated. Use **MIC** for microphones and use **INST** for acoustic guitars and other instruments. Use **OFF** if you do not want to apply a preset.
Note: Use the L1 Mix app to choose custom presets from the ToneMatch library. The corresponding LED will illuminate green when a custom preset is selected.
3. Press the **Channel Parameter Control** to choose a parameter to modify. The parameter name will illuminate white while it is selected.
4. Rotate the **Channel Parameter Control** to adjust the level of the selected parameter. The parameter LED will indicate the level of the selected parameter.
Note: While **Reverb** is selected, press and hold the control for two seconds to mute the reverb. While reverb is muted, **Reverb** will flash white. To unmute reverb, press and hold for two seconds while **Reverb** is selected. Reverb mute will reset when the L1 Pro is powered off.

Channel 3 Controls

Channel 3 is for use with Bluetooth® enabled devices and line-level audio inputs.

Bluetooth Pairing

The following steps describe how to manually connect a *Bluetooth* enabled device to stream audio.

You can use the L1 Mix app to access additional device control. For more information on the L1 Mix app, see **L1 Mix App Control** below.

1. Turn on the *Bluetooth* feature on your mobile device.
2. Press and hold the **Bluetooth Pair Button** for two seconds. When ready to pair, the LED will flash blue.

3. Your L1 Pro will be visible in your device list on your mobile device. Select your L1 Pro from the device list. When the device pairs successfully, the LED will illuminate solid white.

Miscellaneous

Reference Designator	Description	Material Number	Note
J1	CONN, HDR, 1.5mm C, 10P, 1R, P, SMT, ST, BEIGE	847746-0100	
J2	CONN, HDR, 1.5mm C, 11P, 1R, P, SMT, ST, BEIGE	847746-0110	
L3-L12	BEAD, FERRITE, 0402, 0.1A, 1800 OHM, COMM	840686-182D	
SW1-SW3	ENCODER, ROTARY, SWITCH, XRE0126	850872-0010	

DISASSEMBLY PROCEDURE

L1 Pro32 Power Stand Procedures

CAUTION: The SMD integrated circuits used on the Main-I/O Board are extremely sensitive to ESD damage. Be sure to use an approved and tested ESD strap that is properly grounded to your work bench before attempting disassembly or repair of the L1 Pro32 Power Stand.

1. Bottom Cover Removal

1.1 Remove the Upper mid-high array and Lower mid-high array. Put the Power stand upside down. Figure 4.

1.2 The PC sheets **① ④ ⑥** and Rubber feet **② ③ ⑤ ⑦** secured with Pressure Sensitive Adhesive - use a spudger, lift the PC sheets up and Rubber feet, grasp and pull them off. Figure 5.

Re-assembly Note: Be careful to not cause cosmetic damage to the unit.

Use the new PC sheets and Rubber feet to ensure proper adhesion during reassembly.

1.3 Remove the 13 screws securing the Bottom Cover as indicated in Figure 6.

Figure 4. PC Sheets & Rubber Feet Location

Figure 5. PC Sheets & Rubber Feet Removal

Figure 6. Bottom Cover Screws Removal

DISASSEMBLY PROCEDURE

1.4 Use your hands and lift up on the Bottom Cover as indicated in Figure 7.

1.5 Once the Bottom Cover is out from the Top Cover, you will notice that the 2 cables ① ③ & the 1 FFC cable ② are attaching the Main-I/O board from Air fan baffle and Power-Amp Board. Figure 8.

Re-assembly Note:

If the Ferrite bead is in the position as indicated in Figure 8 (left), unwrap the adhesive foam and move it to the position Figure 8 (right) to not get wedged in between the plastic fan housing and any electrolytic capacitors on the board when reassembling.

2. Main-I/O Board Removal

2.1 Perform procedure 1.

2.2 Remove the green adhesive with IPA (Isopropyl alcohol) from the ④ ⑤ cables' connections with Volume board. Figure 9

2.3 Remove the green adhesive ③ holding the Bluetooth antenna cable and disconnect the Bluetooth antenna connector as the red arrow indicated in Figure 9.

2.4 Remove the 7 screws securing the Main-I/O board. Figure 9.

2.5 Pull the 3 Volume knobs out. Figure 10 (left).

2.6 The PC sheet top cover are secured with Pressure Sensitive Adhesive - use a spudger, lift the Top cover up and grasp and pull them off. Figure 10 (right).

Note: Use a heat gun, gently heating the whole top surface moved around the area to help loose the adhesive.

Re-assembly Note:

Use a new replacement PC sheet top cover to ensure proper adhesion during reassembly.
PN: 843967-0110

Figure 7. Bottom Cover Removal

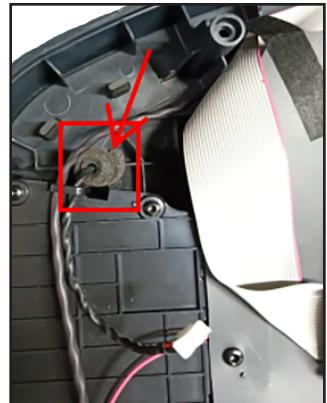

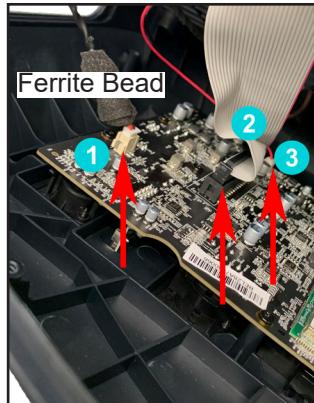

Figure 8. Detach Cables Connection & Ferrite Bead Position

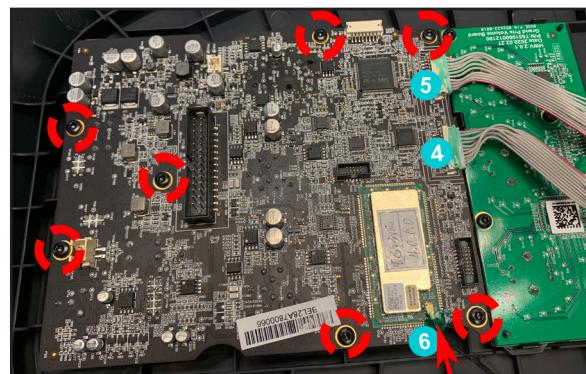

Figure 9. Main-I/O Board Green Adhesive & Screws Removal

Figure 10. Volume Knobs & Top Cover Removal

DISASSEMBLY PROCEDURE

2.7 On the Top cover, remove the 8 screws securing the 4 Jacks. Figure 11 (left).

2.8 Use a nut driver or socket to turn $\frac{1}{4}$ turn to remove the 1/4' Jack socket nut out as the red arrow indicated in Figure 11 (right).

Re-assembly Note:

There are no Device ID concerns when replacing the main board. The Device ID is assigned at the factory. Service replacement Main-I/O PCBA's use the PCBA serial number instead of the system serial number. As a result, the system serial number will not show up in the L1 Mix app.

3. Power-Amp Board Removal

3.1 Perform procedure 1.

3.2 Remove the 5 screws that secured the PP Sheet as indicated in Figure 12 (left).

3.3 Remove the 5 screws that secured the Array base bracket as indicated in Figure 12 (right).

3.4 Disconnect the 6 wires connection. Cable ④ is to 250V Relay. Cables ⑤ ⑥ are from Array base bracket. Figure 13.

3.5 Remove the 4 screws securing the Power-Amp board. Figure 13.

3.6 Use a spudger to separate the white glue from the edge of PCB as red arrow indicated in Figure 14.

Note: When installing the Shield cover, RTV need to be used to prevent buzz and vibration

3.7 Remove the 2 screws securing the Shield cover. Figure 14.

Re-assembly Note:

The old power amp IC thermal grease must be removed with isopropyl alcohol and the new thermal grease, GAP FILLER, THERMAL, part number 749859-0020 MUST be used during board replacement.

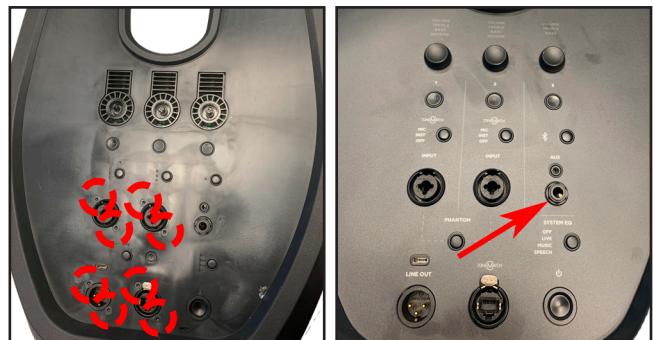

Figure 11. 4 Jacks and Jack Socket Nut Removal

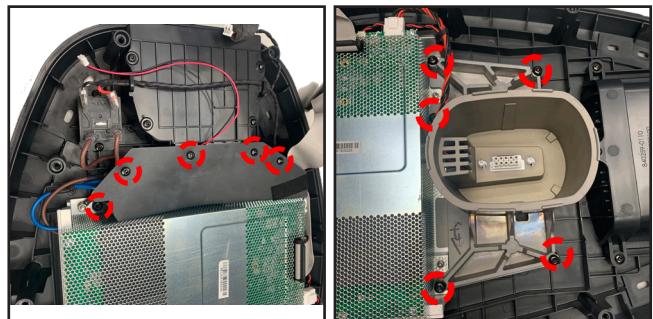

Figure 12. PP Sheet & Bracket Removal

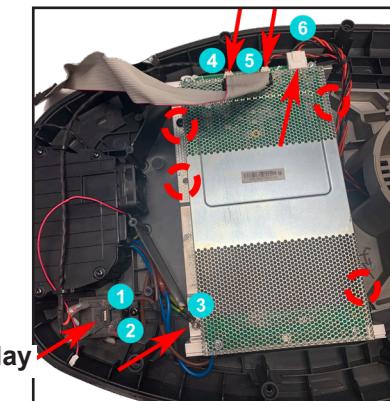

Figure 13. Detach Cables Connection

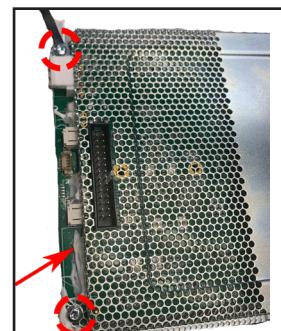

Figure 14. White Glue & Screws Removal

DISASSEMBLY PROCEDURE

4. Volume Board Removal

6.1 Perform step 1.

6.2 Remove the 4 screws that secure the Volume board as indicated in Figure 15.

6.3 Push the 3 Volume buttons out and lift off the board.

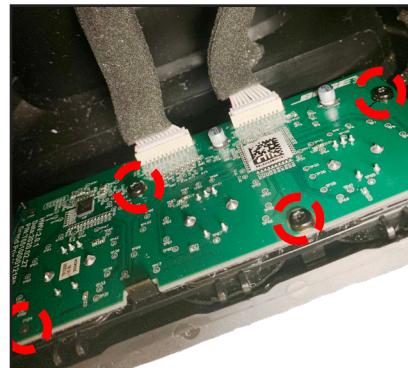

Figure 15. Volume Board Screws Removal

L1 Pro32 Upper Mid-high Array Procedures

1. Grille Removal

1.1 Remove the 8 screws that secure the Endcaps from both ends of the Upper Array as indicated in Figure 16.

Figure 16. Both Ends of Endcaps Screws Removal

1.2 Lift off both endcaps. Figure 17.

Note: Be careful the cable of one of endcaps is very short.

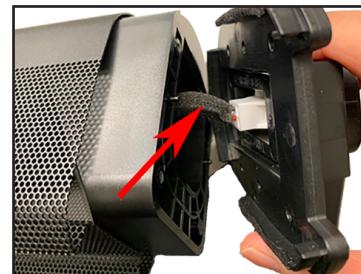

Figure 17. One Endcap Removal

1.3 Grasp the Grille and carefully slide the grille off of the baffle. Figure18 (left).

Re-assemble Note: Be sure there is sufficient gasket material on the Grille to prevent buzzes as the red arrow indicated in Figure18 (right).

Gasket material PN: 843112-0101

Perform the Array sweep tests after replacing the Grille.

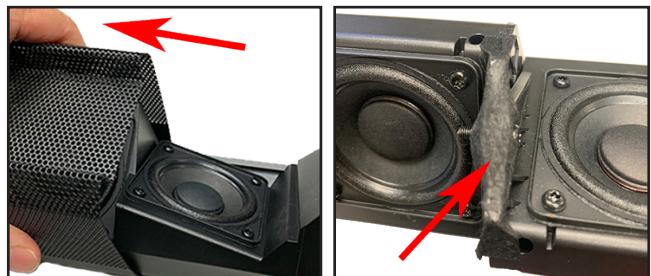

Figure 18. Array Grille Removal & Gasket Material Location

DISASSEMBLY PROCEDURE

2. Drivers Removal

2.1 Perform procedure 1.

2.2 Remove the 4 screws securing the 1 Driver to the Baffle as indicated in Figure 19 (left).

2.3 Detach the Driver's cable by pressing the white fastener. Figure 19 (right).

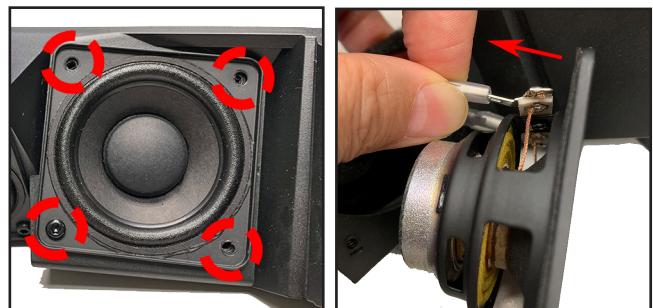

Figure 19. Driver Screws & Cable Removal

L1 Pro32 Lower Mid-high Array Procedures

1. Grille Removal

1.1 Remove the 8 screws that secure the Endcaps from both ends of the Upper Array as indicated in Figure 20.

1.2 Same procedures as Upper Array disassembly from step 1.2 to step 2.3.

Figure 20. Both Ends of Endcaps Screws Removal

SOFTWARE UPDATE

These instructions explain how to update the firmware of your L1 Pro8, L1 Pro16, L1 Pro32, Sub1, or Sub2.

Note: A USB-C cable is required (not included with your product). The L1 Pro family of products is not compatible with Thunderbolt 3 cables.

1. On a computer, open a web browser and go to btu.bose.com.

Note: Not compatible with Internet Explorer or Safari.

2. Click **Download** to download the **Bose Updater**.

Compatible Web Browsers	
Windows	Google Chrome, Mozilla Firefox, Microsoft Edge
Mac	Google Chrome, Mozilla Firefox

Bose Updater

Take a moment to download and install the **Bose Updater**. With this app, you can easily update your product and find out when new software updates are available. After you've installed it, you can use this website to update your products. If you've already installed the app, go ahead and launch it!

[Download](#)

[Launch](#)

3. View the End-User License Agreement, then click **I Agree**.
4. Install the **Updater**.

Bose Updater

Here's how it works...

-  Run the **Bose Updater** installer and make sure the app has successfully installed. The app icon should be visible in your system tray at the bottom of your screen (Windows) or the menu bar at the top of your screen (Mac).
-  Once installed, **launch the Bose Updater** app.
-  You'll need to find a USB cable or drive to connect the product.
-  The **Bose Updater** will tell you if there are any available updates for your product.

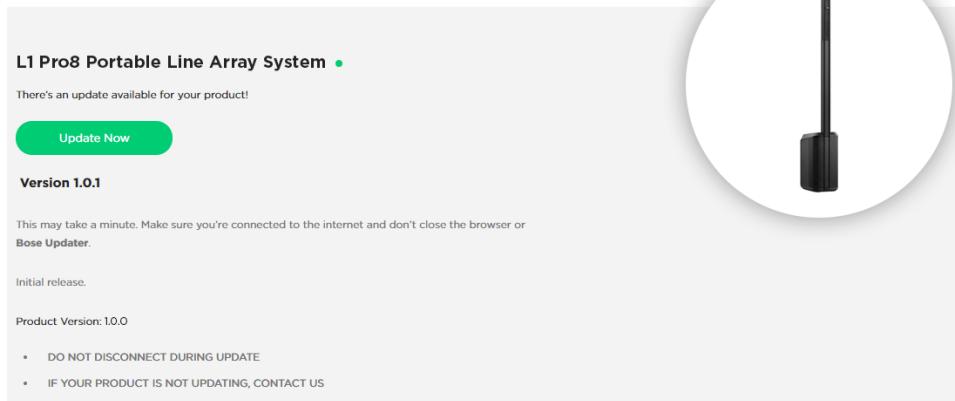

If this page doesn't change once you've launched the Bose Updater from your desktop, [click here](#).

5. Once installed, open the **Updater**.
6. Plug your product into a power source.
7. Connect your product to your computer using a USB-C cable. The **Updater** will identify your product automatically.

SOFTWARE UPDATE

- If your product needs a software update, your screen will read, **There's an update available for your product!**

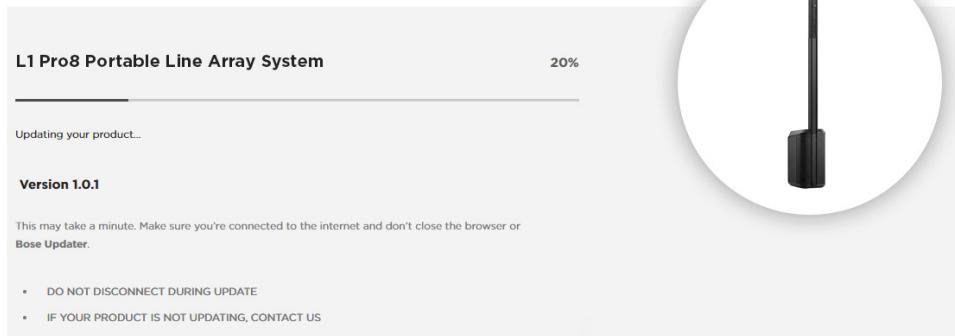

Bose Updater

- Click **Update Now**.

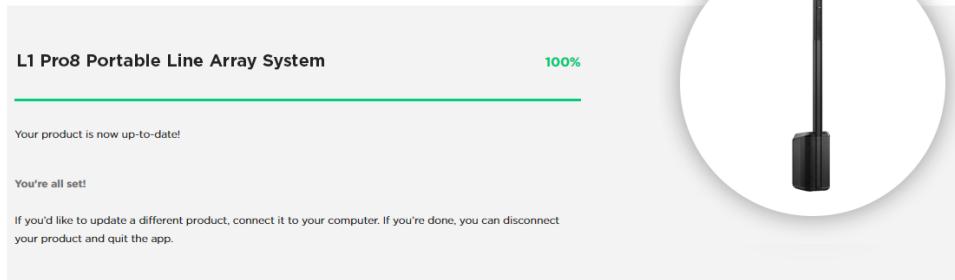

Note: Do not unplug or power off your product while the update is in progress.

Bose Updater

- Once the update is complete, your screen will read, **Your product is now up-to-date!**

Bose Updater
