FreeSpace® E-4 System

General Description

The Bose® FreeSpace® E-4 system is an integrated four-channel digital signal processor and 400-watt power amplifier for 70/100V business applications.

Freespace system Installer™ software, included with each unit, makes it easy to configure and service the E-4 system.

With capacity for four source inputs, including two Line In, one Mic/Line and one Page/Mic/Line, the E-4 system provides the inputs needed for most business music installations.

Its proprietary power-sharing amplifier dynamically shares 400 watts across 4 output channels ranging from as low as 1W to as high as 400W. For example, if you have a two-zone system that requires 5 watts in Zone 1 and 395 watts in Zone 2, the FreeSpace E-4 system distributes the power based on those needs.

As a single component, the E-4 provides the processing and control features required for one-to-four zone business music applications. These features include:

- Auto Volume: Offers dynamic control of individual zone volume levels to compensate for changes in background noise level. Auto Volume requires the use of the FreeSpace E-4 System Auto Volume Mic Kit.
- Scheduling: Allows programming of the E-4 system for automated on/ off, volume, and source changes according to time of day or day of week.
- Opti-Voice® paging: Provides the appropriate sound level regardless of variations in speech projection.
- Source Leveling: Automates system compensation for variations in source input levels.
- Dynamic Equalization: Maintains tonal balance at all listening levels.

Power Requirements (±10%)

120 VAC/50-60 Hz 220 VAC/50-60 Hz 240 VAC/50-60 Hz 100 VAC/50-60 Hz

Fusing/Protection

120V: T6.25A, 250V rated 240V: T3.15A, L250V

Size (H x W x D)

5.25" (3U) x 17.25" x 15.5" (13.3 cm x 43.8 cm x 39.4 cm)

Weight

30 lb (13.6 kg)

Enclosure Construction

Steel chassis designed for rack or shelf mounting

E-4 System Engineers' and Architects' Specifications

The system shall use a digital signal processing architecture running at a 44.1 kHz sample rate. The frequency response shall be from 20 Hz to 20 kHz (±3dB). The signal-to-noise ratio shall be greater than 100dB A-weighted.

The power amplifier section shall deliver 400W of maximum power with less than 1.0% THD from 20 Hz to 20 kHz (±3dB). Channel separation shall be >70dB, 20 Hz to 20 kHz.

The system shall consume power of 60 watts or less at idle, 200 watts with musical program, 600 watts at maximum continuous rated power (1 kHz, sine wave input) 70V or 100V mode.

The system shall run the following algorithm and controls:

- Input Gain
- Input Trim
- Source Leveling
- Mic/Line/Page Assignment
- Opti-Voice® paging
- · Signal Routing
- Auto Volume Setup
- Scheduling
- Dynamic EQ
- Music on Hold
- Room EQ
- Loudspeaker EQ for Bose® speaker products
- Output Level Control Scheduling
- Limiting
- · System Diagnostics

The system shall weigh 30 lb (13.6 kg).

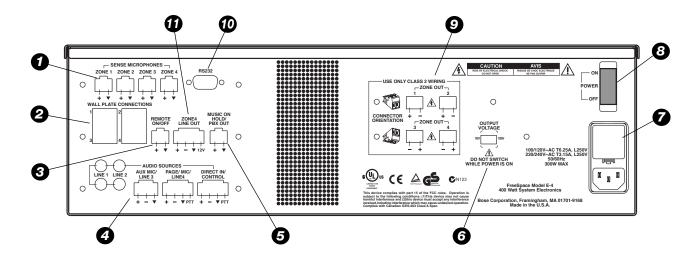

The system enclosure construction shall be a steel chassis designed for rack or shelf mounting.

The system shall be the FreeSpace® E-4 system from Bose.

General Description ...continued

- Music on Hold: Provides an output for simple integration into a phone system.
- Room Equalization: Provides easy adjustment of tonal balance in each zone.
- Limiting: Protects loudspeakers from unwanted transient power loads.
- Signal Routing: Allows for an input source to be routed to any of the four amplifier outputs.
- System Diagnostics: Generates an extensive error log and includes an easy-to-replace memory module to minimize downtime.
- RS-232 for connection to a PC.
- Remote Power Sequencing: Provides a contact closure input.

Rear Panel Features

- Sense Microphone Inputs
- 2 Wall Plate Connections
- 3 Remote On/Off Input
- 4 Audio Source Connections
- **5** Music on Hold

- 6 Output Voltage Switch (70/100V)
- 7 Fuse Box with Voltage Selector
- 8 Power On/Off Switch
- 9 Amplifier Outputs
- 10 RS-232 System Control PC Input
- Auxiliary Output/Control

E-4 System Accessories

Optional Bose® accessories for the E-4 system		
Accessory	Description	PC Codes
FreeSpace® E-4 System Rack Mount Kit	One pair of rack ears	PC029858
FreeSpace E-4 System User Interface Kit	Wall-mount keypad that fits into a standard single-gang junction box	PC029856 (US) PC029857 (Euro)
FreeSpace E-4 System Auto Volume Interface Kit	Wall-mount keypad that fits into a standard single-gang junction box	PC030101 (US) PC030102 (Euro)
FreeSpace E-4 System Auto Volume Mic Kit	One sensing microphone for stand-alone use or installation in a standard single-gang junction box	PC029859 (US) PC029860 (Euro)
FreeSpace E-4 System Auto Accessory Kit	Supplemental rear panel mating connectors and non-skid feet	PC030105

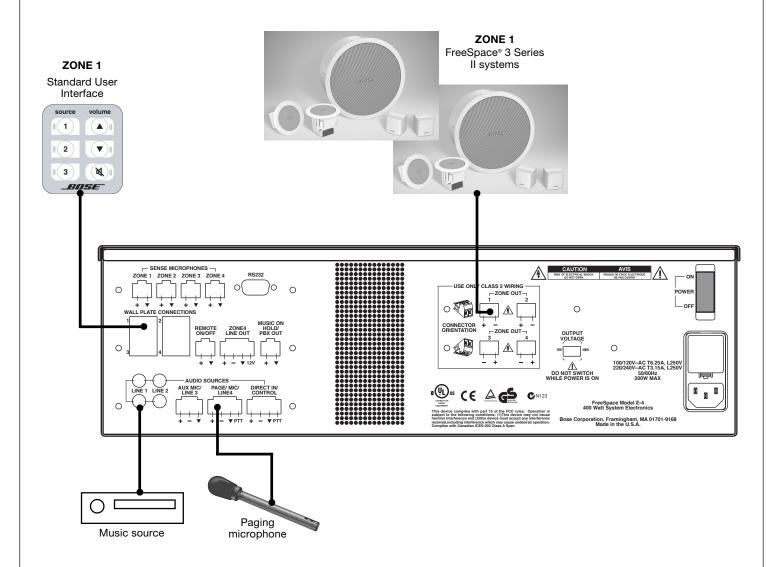

Safety and Regulatory Compliance

The FreeSpace E-4 system complies with UL6500 2nd edition, EN60065, and IEC60065:1998 (6th).

Warranty Information

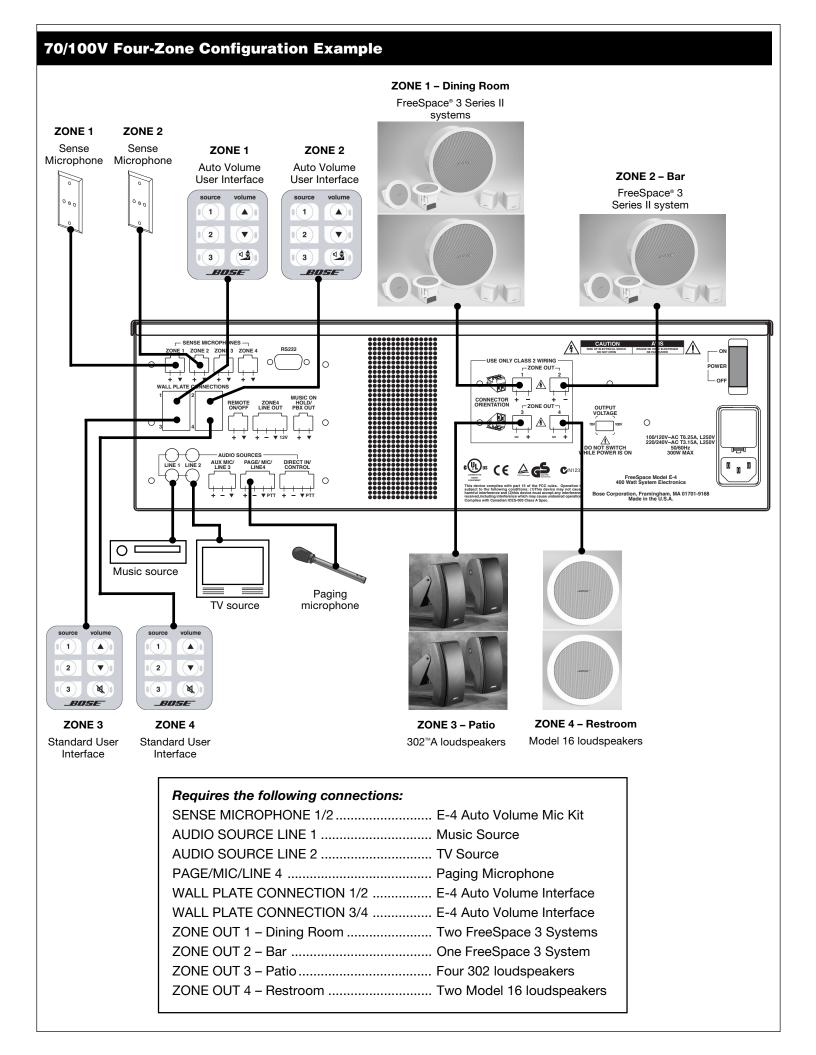

The FreeSpace E-4 system is covered by a five-year transferable limited warranty.

70/100V Single-Zone Configuration Example

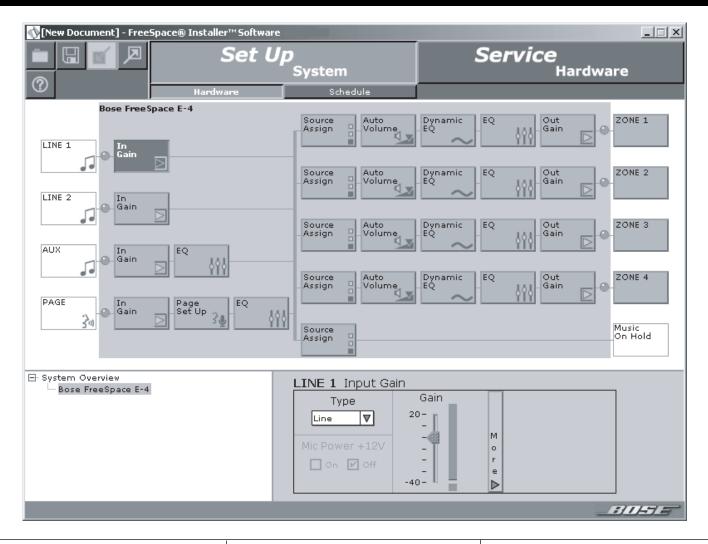

Requires the following connections:

WALL PLATE CONNECTION 1 E-4 Standard User Interface
AUDIO SOURCE LINE 1 Music Source
PAGE/MIC/LINE 4 Paging Microphone
ZONE OUT 1 Two FreeSpace 3 Systems

FreeSpace® System Installer™ Software

Features and Control Settings

(accessible using FreeSpace® system *Installer*™ software):

- Input Gain
- Input Trim EQ
- Source Leveling
- Mic/Line/Page Assignment
- Opti-Voice® paging
- Signal Routing
- Auto Volume
- Scheduling
- Dynamic EQ
- Music on Hold
- Room EQ
- Loudspeaker EQ for Bose® speaker products
- Output Level Control
- System Diagnostics

System requirements for *Installer* software:

- Hardware
 - Minimum 200 MHz
 Pentium*-based PC
 (400 MHz recommended)
 - 128MB free RAM (256MB recommended)
 - 16-bit audio sound card
 - 4x CD-ROM
 - 50MB free internal hard disk space
- Operating System(s)
 - Windows 98, Windows NT 4.0, Windows 2000, Windows ME
- Display
 - 800 x 600 resolution, 16-bit color (32-bit color recommended)

For further information, contact Bose Corporation Professional Systems Division. Or visit us on the web at http://pro.bose.com.

The *Installer* software makes it easy to configure the E-4 system, using a Windows PC.

Installer software is a copyrighted application in Sound System Software (S[™]software) from Bose. A copy of the Installer software is included in the box with each E-4 system.
