

Bose Professional Releases 802 and 402 Series V Loudspeakers

One of the best-selling sound reinforcement loudspeakers of all time returns

FRAMINGHAM, Mass. – December 6, 2024 – [Bose Professional](#), developer of world-class audio experiences designed to transform any space, announced the availability of iconic [802](#) and [402 Series V](#) loudspeakers. First introduced in 1978, 802 and 402 loudspeakers combine multiple, tightly arrayed drivers and a highly engineered enclosure to deliver unmatched reliability, natural sound quality, and extremely resilient weather protection in restaurants, bars, hotels, clubs, and outdoor spaces worldwide.

Now in its fifth generation, the 802 continues to feature eight 4.5” full-range drivers configured to deliver smooth frequency response, wide dispersion, exceptional power handling, and efficient performance. The proprietary array design ensures a wide 120° × 100° coverage pattern, while the 52 Hz low-frequency range can eliminate the need for subwoofers. The 402 Series V features four of the same 4.5” full-range drivers, providing a 120° × 60° coverage pattern, a 73 Hz low-frequency reach, and 119 dB peak SPL capacity.

["802 and 402 Series loudspeakers](#) earned their reputations as legends in the industry for a good reason," said Shawn Watts, Director of Product Management. "The new 802 and 402 Series V have been engineered to deliver clear, powerful sound over a wide area, reducing the need for multiple loudspeakers. They are famously reliable in adverse conditions, making them perfect for indoor/outdoor applications that require the perfect blend of power, clarity, and performance. The Series V re-introduces this speaker to the market, and we're proud to continue building on its legacy."

Both 802 and 402 series loudspeakers feature a rugged, lightweight enclosure that is IP55 weather-rated for durability in indoor and outdoor installations. Flexible mounting options allow for easy, secure installations in various configurations.

Available in black, [802 Series V](#) is compatible with the 802 U-Bracket and WBP-8 wall-mount adapter. The [402 Series V](#) is available in black and white and offers compatibility with the surface-mount pan and tilt bracket for mounting in a variety of spaces.

Bose Professional 802 and 402 Series V models are currently available only in China, Thailand, Vietnam, Indonesia, Philippines, Singapore, Malaysia, South Korea, and India. For more information visit [BoseProfessional.com](#).

About Bose Professional

Founded on the belief that innovation begins with exploration, [Bose Professional](#) is dedicated to delivering a variety of solutions for today's diverse environments. The company's spirit of invention is focused on creating systems that are easy to design, install, and operate for performance and commercial applications. These systems can be heard all around the world in hotels, retail stores, restaurants, houses of worship, universities, and more. For more than 50 years, Bose Professional has partnered with AV integrators, system designers, installers, and consultants to build unforgettable audio experiences.
